About the Jewelry Week

For the very first year, the Milano Jewelry Week turns jewellery into the real protagonist in the urban panorama with over 50 themed events. Top-level jewellers, goldsmiths and laboratories, schools and academies, as well as fashion boutiques and design showrooms in the city centre all participate in this widespread event born to highlight the relationship between fashion, jewellery and design. Thanks to a heterogeneous program, the Milano Jewelry Week is dedicated both to professionals in the sector and to the wider public to make people discover the magical universe of jewellery.

Events-within-the-event

As part of the vast event calendar, various side events happen in contemporary with the Milano Jewelry Week. These include also the Fall Edition of *Artistar Jewels 2019* featuring the participation of over 160 international artists and designers displaying their beautifully-crafted creations in the exhibition space of Palazzo Bovara, at no. 51 Corso Venezia.
